My account Login Create Account FLX-28 has more features built in than any previous single flasher sonar system. When fans of Vexilar say we could never improve the FL-8 that we introduced over twenty years ago, they were amazed when the FL-18 hit the ice in 2002. By the time the flat-screen FL-12 and FL-20 came out, Vexilar had established a new gold standard in flasher performance... Watch Vexilar FLX-28 Operation Video SOLD OUT - Check with your local dealer! The FLX-28 has more built-in features than any previous single flasher sonar system. When fans of Vexilar say we could never improve the FL-8 that we introduced over 30 years ago, they were amazed when the FL-18 hit the ice in 2002. By the time the flat-screen FL-12 and FL-20 came out, Vexilar had established a new gold standard in flasher performance. Surely, Vexilar couldn't improve on this? Welcome to the age of the FLX series! A unique data transfer design system without brush data makes it possible to create a groundbreaking flasher display with digital depth and Auto Ranging technology. Features found in FLX-28 read as the wish list of avid ice anglers: digital depth, auto range, two zoom zones, five color palettes to choose from for maximum visibility, five foot depth range adjustments starting at 10 feet, maximum range of 300, day and night display brightness settings, low power options for fishing in super shallow water, and a unique weed mode for better performance while fishing in weeds. And on top of it all out, the device even has its own demo mode, so you can show non-Vexilar fans how the system works with a lifelike fish catching simulation to see. The FLX-28 is completely revolutionary in the sonar technology of the winter blower. Vexilar has come a long way from the beginning of FL-8, but over the last 50 years Vexilar has never changed their commitment to delivering the very best sonar systems in the world. Performance, quality, innovation and reliability – welcome to the amazing FLX-28.
